

SAVE OUR SEAS

DUFFY'S COASTS

ACTIVITY 2: INVESTIGATING COASTS

Lesson Objective

- Use a glossary to name the different parts of the coast.

Use your glossary to identify the coastal features that are shown on the picture on the following page.

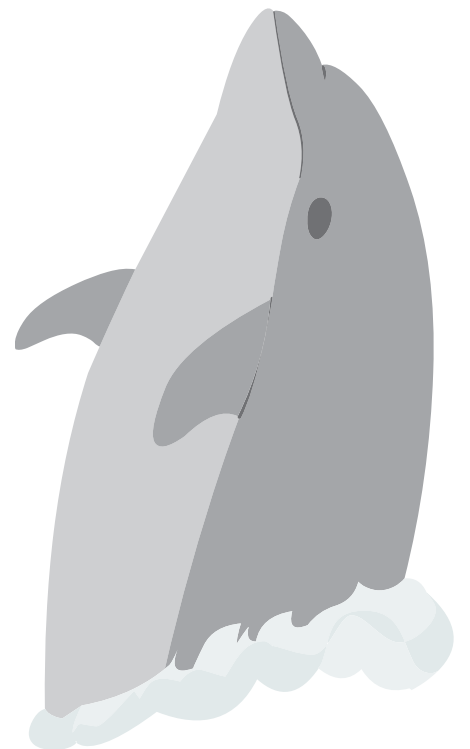

- Sea arch
- Sea stack
- Groynes
- Shingle
- Sea cave
- Dunes
- Beach

Duffy says,

"Climate change affects us sea-dwellers just as much as humans. And don't forget that if sea levels rise, some of the beaches you enjoy today won't exist any more.

"Renewable energy and marine renewable energy like solar, wind, and wave power can produce electricity without creating waste products such as nuclear waste or CO² (carbon dioxide) as a by-product. Just as we harness energy from the sea to surf or windsurf our same playgrounds can be used in creating cleaner and safer energy. "
