

Call of the Wild

Campaign Tour (Part I)

Nature has been showing us its destructive side in recent years and it needs help from us to put it right. For our oceans, rivers and lakes climate change is already leading to more water pollution but unless we curb our carbon dioxide emissions we are set for a worsening scenario. Find out more about Surfers Against Sewage (SAS) campaigns and how climate change is threatening our use of water for recreation at one of our campaign roadshow stops!
