Excellent

The test passed the higher, recommended standards for faecal coliform, total coliform and faecal streptococci.

- Total coliform no more than 500 per 100ml.
- Faecal coliform no more than 100 per 100ml.
- Faecal streptococci no more than 100 per 100ml.

To achieve this overall result for a season, 80% of all samples must be equal to, or better than the above standards for total and faecal coliform and 90% must be equal to or better than the standard level for faecal streptococci.

Good

The test passed the legal minimum standards for faecal coliform and total coliform

- Total coliform no more than 10,000 per 100ml.
- Faecal coliform no more than 2,000 per 100ml.

To achieve this overall result for a season, 95% of all samples must be equal to, or better than the above standards.

Poor

The test failed the legal minimum standards for faecal coliform and total coliform
